Analytical constituents per L

Crude protein	2.0 %
Crude oil and fat	0.9 %
Crude ash	1.6 %
Moisture	78 %
Sodium	< 0.1 %

Instructions for use

- EWES:** Administer 3-4 weeks prior to tugging to help support fertility and conception rates. Administer 4-5 weeks before lambing to help support the ewes' diminishing energy and mineral reserves.
- LAMBS:** Feed at weaning to help support growth and vitality and to help support recovery from weaning stress.
- RAMS:** Administer 3 weeks to 3 days prior to tugging to help support energy, fertility and stamina.
- CALVES:** Administer from 4-6 weeks of age or at weaning to help support growth and development.

Contains Cobalt, feed only to animals with a fully functioning rumen.

Simultaneous supplementation of additives with a maximum content from other sources should be avoided. Before using it is recommended to take advice from a veterinarian or nutritionist.

Nettex Cobalt Selenium Drench Specification

Quantity

Lambs:	Young.....	1 ml
